DETAILED ACTION

In response to the communication filed on April 28, 2004, claims 40-41, 45-76 are pending in this application and claims 40-41, 45-61 and 70-75 are withdrawn from further consideration.

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I drawn to a method for forming a semiconductor device having/with the first bottom insulation layer on the bottom portions of the first troughs according to first embodiment. It appears that claims 63-64 read on this particular embodiment.

Species II drawn to a method for forming a semiconductor device without the first bottom insulation layer on the bottom portions of the first troughs according to second embodiment. It appears that claims 62, 65-69 and 76 read on this particular embodiment.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic. Applicant is referred to MPEP 806.04(c) and 806.04(d) for the definition of a generic claim.

Should applicant elected Species II, then one of the following sub-species must be elected:

Sub-species I drawn to a method for forming the second integrate dielectric layer by thermal growth of silicon dioxide. It appears that claim 65 read on this particular embodiment.

Sub-species II drawn to a method for forming the second integrate dielectric layer by deposition of oxynitride by CVD. It appears that claim 66 read on this particular embodiment.

Sub-species III drawn to a method for forming a semiconductor device with the first gate dielectric layer having an approximate thickness between 5 and 10 nanometers. It appears that claim 68 read on this particular embodiment.

Sub-species IV drawn to a method for forming a semiconductor device with the second gate dielectric layer having an approximate thickness between 5 and 10 nanometers. It appears that claim 69 read on this particular embodiment.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed sub-species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, it appears that claims 62, 67 and 76 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack Chen whose telephone number is (571)272-1689. The examiner can normally be reached on Monday-Friday (9:00am-6:30pm) alternate Monday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl W Whitehead can be reached on (571)272-1702. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
